Kaztec's DLB Ekulo Cheyenne installing 250 Tons Kita Marine B Deck for a client (15m water depth)

Health, Safety & Environment Achievements

- Achieved 1.9million man-hours without fatality
- Load-out & Transportation of 9,039 joints (24" Line Pipe) from Intels Dock quayside (Calabar port) to pipe stack location without LTI. (NIPP: LOT 3)
- Successful transportation of process facilities of up to a height of 16m from Onne to Calabar with the challenges of the busy road and overhead National Grid Cables
- Completed integrity assessment on an existing 18" Pipeline for Oben – Sapele Power Plant without LTI. (NIPP: LOT 4)
- Completed Installation of over 25KM (4" - 40") Pipeline crossing by HDD without LTI.
- Completed Load-out & Installation of 3 nos. decks ranging between 50Ton - 250Ton in water depth of 15m - 40m without LTI. (TB: 1921 Project)
- Completed Installation of (2 nos. 16" X 13KM, 12" X 2.6 KM, 8" X 8.77KM, 6" X 3.2KM) including Hydro test and Pre-commissioning for Offshore Pipeline without LTI. (TB: 1921 Project)

Quality Policy

To achieve and sustain excellence in all our activities by;

- Carefully maintaining high standards
- Continuously monitoring and evaluating our results
- Reviewing quality performance through the implementation of an effective Total Quality Management System based on ISO 9001:2008 Standard
